

## CLEAN & GO

BLIK FRAME WITH BLOCK SYSTEM CM 40

Product code. 00000877Y

Frame for disinfection or washing made of shock-proof plastic. It is characterized by: \* A round button to open it comfortably and silently \* Rounded edges to insert mop heads more easily \* A completely flat bottom to exert an even washing pressure on the mop head, for more effective cleaning The real innovation consists however in its patented universal automatic clamping system. When using the Blik system, mops with pockets remain hanging on the frame when being rinsed and pressed, with no more bending and very few contacts with dirt and chemical solutions. Blik is light, handy and ecological, as it is made of first-rate plastic materials. Its 360° articulated joint allows the operator to move it quite easily, reaching even portions of floor under furniture. Available in size 40x11 cm and 50x13 cm.

### TECHNICAL DATA

Size (WxDxH cm)	40 x 11
Unit Net Weight (kg)	0.51
Gross Weight Package (kg)	6.5
Volume Package (m3)	0.02
Package (pcs)	10
