SIZE CM 93 X 52 X48  
CAPACITY:90 L  
MATERIAL: PP  
PACKAGING:2 PIECES  
NET WEIGHT:8.5 EACH

OPEN-UP is the first 90-litre bin for waste-material collection equipped with a plastic door. This product is a good solution in HACCP Areas and is available with colour coded bins.

OPEN-UP has been devised to improve working conditions, as workers can take out the bag without lifting it, but simply opening the door in the front. In this way they avoid useless efforts and protect their backbone from little traumas, as well during the cleaning operation INSIDE the bin ( this is an important operation that usual takes long time )

OPEN-UP is equipped with

- An ergonomic handle to move it easy
- Small Box for disinfectant or deodorizer integrated with the lid
- A plastic bag-holder
- A plastic lock on the lid where to fix the bag-holder when taking out the bag
- 2 wheels with non-marking rubber diam. 125 mm
- a door with 2 fixing point (open/close)
- a pedal to open the lid
