

Manual Sweeper SW250

Description

Because it is compact and lightweight, the SW250 Hand Sweeper can also be used in small or very confined spaces. The brush rotates through the gear system when the operator pushes the machine forward, resulting in a very low noise level. There is no motor, so daytime cleaning is an attractive and inexpensive option.

- Direct scanning system to guarantee an excellent result.
- Long-term cleaning capacity: 38 liter container that can be kept open to facilitate the collection of larger waste or to empty a garbage can inside, etc.
- Easy to maneuver: large non-marking wheels facilitate mobility.
- Good dust control: built-in filter to improve dust control and operator comfort.
- Suitable for outdoor use: resistant and anticorrosive.
- Virtually maintenance-free: simple mechanical construction with gear and belt drive. No motor or battery.
- The handle can be adjusted to the height of the operator (3 positions).
