

Dyson Airblade 9kJ hand dryer

Description

- The Dyson Airblade 9kJ hand dryer has a HEPA filter, which captures 99.95% of air particles, including bacteria and viruses, thus providing hygienic hand drying with clean air. It is faster and more energy efficient.
- It uses 9.1 kilojoules of energy per drying and costs only € 19 per year in Eco mode. The powerful digital engine reaches 75,000 rpm to propel 23 liters of air per second, during a drying period of 10 seconds in Max mode.
- It has 2 power modes, max 900w and ECO 650w mode. Efficient and economical, the Dyson Airblade 9kJ hand dryer produces up to 85% less CO2 than paper towels and costs up to 99% less to use. Thus, it provides a better environment in the bathrooms and in the outside world.
- Has HEPA filters
- Drying in 10 seconds
- Low energy consumption
- Quieter than conventional models.
- 5 Years warranty
