

Horizontal Wall Baby Changing Station White - Mediclinics

Description

The BabyMedi® horizontal wall mounted baby changing station has been developed to offer high standards of safety, hygiene and resistance in high usage public spaces such as shopping centres, airports, hospitals, public buildings, nurseries and hotels.

Manufactured in white polypropylene with **integrated Biocote® antibacterial additive**, this baby changing station incorporates technology based on silver ions directly embedded into the plastic. **This antimicrobial protection reduces the proliferation of bacteria, fungi and microorganisms responsible for odours, stains and contamination**, facilitating cleaning and ensuring greater safety for babies and users.

The bed of approximately 1,900 cm² provides a wide and

[Horizontal Wall Baby Changing Station White - Mediclinics](#)

stable area for diaper changing. It includes an adjustable nylon safety belt with quick release fastening, ensuring additional protection during use. For greater functionality, it features two integrated side hooks, ideal for hanging bags or belongings, keeping everything accessible and organised.

It can be complemented with a disposable liner dispenser with lock and special key, with capacity for 80 units (not included). The opening and closing system remains completely hidden, composed of reinforced steel hinges and a pneumatic cylinder that ensure smooth, controlled and durable movement.

Certified according to EN 12221-1 and EN 12221-2 standards, it meets the requirements for static load tests of 50 kg for one hour and has been tested to withstand loads above 100 kg. Direct wall installation.

- **Dimensions (length x width x height):**

- Closed: 860 x 100 x 480 mm
- Open: 860 x 570 x 480 mm

Recommended installation height: between 700 and 800 mm from the floor to the lowest point.

A professional, safe and hygienic solution for environments that require durability and compliance with European standards.
