

## Horizontal Fraldarium Polypropylene and Stainless Steel Matte Black with Ionizer - Mediclinics

### Description

The BabyMedi Ion horizontal wall mounted baby changing station has been developed for public spaces that require high standards of safety, hygiene and durability, such as hotels, shopping centres, airports, public buildings, nurseries and catering areas. Designed for high traffic installations, it combines structural resistance with advanced antimicrobial protection technology.

Manufactured in polypropylene with integrated **antibacterial additive, it incorporates Biocote® technology with silver ions directly embedded into the plastic**, reducing the proliferation of microorganisms responsible for odours, stains and contamination. Biocote® technology provides continuous antimicrobial protection, preventing the reproduction of harmful microorganisms, fungi and mould.

[Horizontal Fraldarium Polypropylene and Stainless Steel Matte Black with Ionizer - Mediclinics](#)

**This model also includes an ionizer with Ion Hygienic technology**, which emits negatively charged particles (anions) capable of neutralising viruses and bacteria in the environment. The effectiveness of the system has been tested and certified by TÜV Rheinland (Report n° 60329708-001), reinforcing safety and protection during use.

The exterior in AISI 304 stainless steel with matte black finish provides additional robustness and a modern design that integrates harmoniously into any restroom. It includes an adjustable nylon safety belt with quick release fastening, as well as two side hooks for hanging bags or backpacks, keeping personal belongings accessible.

**Certified according to EN 12221-1 and EN 12221-2 standards**, it has been tested to withstand a static load of 50 kg for one hour and has also demonstrated resistance above 100 kg in internal laboratory tests.

Compatible with disposable liner dispenser with lock and special key, with capacity for 80 units (not included).

- **Dimensions (length x height x width):**

- Closed: 860 x 565 x 100 mm
- Open: 860 x 480 x 570 mm

A professional, certified and technologically advanced solution for facilities that value enhanced hygiene and comfort for families.
