

Phenolic Locker Type 1 Door

Description

- Lockers: 1 door per column
- Phenolic locker: Phenolic is produced through a meticulous manufacturing process, which involves impregnating layers of kraft paper with thermosetting phenolic resins. Under high temperatures and pressure, these layers are fused together to create a strong and durable end product, giving phenolic a series of properties that make it ideal for a variety of applications in furniture components.
- Long durability.
- Anti-corrosion screws
