

## Automatic Hand Dryer with HEPA Filter

### Description

We present the intelligent automatic hand dryer, ideal for public and professional restrooms that require hygiene, speed, and energy savings. With a modern and durable design, it is perfect for businesses, shopping centers, hospitals, schools, and other high-traffic spaces.

- **Made of ABS with an anti-vandalism design**, this hand dryer offers easy installation and maximum resistance.
- With advanced air-jet technology, a 900W motor, and speeds up to 150 m/s, it guarantees fast and efficient drying.
- The **antibacterial HEPA filter** ensures maximum hygiene, eliminating germs from the air.
- The **ECO sensor** automatically adjusts the temperature according to the environment, optimizing energy consumption.
- It also features an operation indicator light, low noise level (72 dB), and IPX1 protection against water splashes, making it perfect for intensive use
