

Polyethylene Laundry Tub with Stainless Steel Rolling Base – 250L or 440L

Description

Versatility and strength for transporting laundry in professional environments.

The Laundry Tubs with Rolling Base are the practical solution for hotels, laundries, hospitals, and industrial units that need to transport or store large volumes of laundry, towels, or textile waste.

- Made of high-resistance polyethylene, the tubs are available in two capacities (250 L and 440 L).
- They can be used individually or combined with a stainless steel 18/8 rolling base, fitted with Ø160 mm wheels for smooth mobility and safe handling.
- The base's robust structure ensures stability even with heavy loads, while the compact design makes it easy to use in corridors and work areas.
- Key features:
 - High-density polyethylene tubs, easy to clean;
 - Stainless steel 18/8 bases, corrosion-resistant;
