

Kensington 0.6L 1000W Electric Kettle

Description

The Kensington 0.6L 1000W Electric Kettle is the perfect choice for hotels seeking to combine elegance and functionality in a single appliance. With a modern design in brushed steel and black, this compact kettle stands out with its push-button lid opening system, allowing easy and quick access to water.

The 360° swivel base offers maximum flexibility in use, while the removable filter facilitates daily cleaning, ensuring a consistently hygienic experience for your guests. Equipped with the Strix thermal controller, globally recognized for its precision in temperature control and enhanced safety against dry boiling, this model ensures reliable and durable performance.

The integrated cable with practical storage helps keep spaces organized on welcome trays in hotel rooms.
