

## Bathtub with Electric Lift Seat and Watertight Door

### Description

This bathtub with an electric lift seat is the ideal solution for adapted bathrooms in hotels, hospitals and clinics that seek to combine comfort, safety and functionality.

With a modern design in white, it easily integrates into any environment, providing an accessible bathing experience for people with reduced mobility.

The watertight door offers easy and safe access, while the lift seat allows the height to be adjusted according to the user's needs, and can be used as a raised platform or lowered for a traditional bath.

The low entry level ensures a comfortable and safe approach to the interior of the bathtub. For greater versatility, the seat can be removed when desired for conventional use. Taps not included.

Available in two length options (1500 mm or 1700 mm) and left or right configurations, it supports up to 165 kg ensuring robustness and durability. The simple controls facilitate the operation of the electric lift seat system,
