

Telegant 36 Protect Plus Wall-Mounted Drying Rack

Description

The Telegant 36 Protect Plus wall-mounted drying rack is a compact, practical, and resistant solution for drying clothes in bathrooms, balconies, and small spaces, making it ideal for hotels, local accommodations, and Airbnb.

When closed, it functions as an elegant wall-mounted towel rack, thanks to the integrated aluminum bar. When open, it measures **70 x 11 x 35 cm (length x height x width)** and features **five extendable rods of 60 cm**, offering a total drying length of 3.60 meters, sufficient for guests' needs.

Manufactured with rods protected against rust, it ensures durability even in humid environments. The wall-mounted system allows space saving, keeping the drying rack completely folded when not in use. The robust structure ensures a high load capacity, while installation is simple and quick, with fixing material included.

Resistant to outdoor conditions, the Telegant 36 Protect Plus protects the rods from dirt and rain when closed, making it a reliable solution also for balconies and terraces.
