

77 cm Stainless Steel Waste Bin

Description

The 77 cm stainless steel waste bin was designed for indoor environments that require a robust, hygienic and low-maintenance solution for daily waste management. Ideal for high-traffic areas, it combines operational simplicity with a discreet and professional design.

Manufactured in **brushed 201 stainless steel**, it ensures excellent resistance to continuous use and frequent exposure to humidity. This model does not include an inner container, allowing the bag to be placed directly inside the bin.

With a **diameter of 40 cm and a height of 77 cm**, it easily adapts to common areas, receptions, corridors, breakfast zones, offices, restrooms and other professional spaces where efficiency and durability are essential.

The brushed surface facilitates cleaning, reduces visible
