

50L Coated Iron Waste Bin with Inner Container

Description

The 50L waste bin with inner container is a professional solution for efficient waste management in commercial and institutional environments with high traffic. Developed for continuous use, it combines structural robustness with ease of maintenance, making it suitable for spaces where operational reliability is essential.

The outer structure is manufactured in coated iron with a thickness of 1.0 mm, ensuring resistance to intensive use in public areas. The inner container in galvanised sheet facilitates waste collection, allowing quick bag replacement and more efficient daily cleaning.

With a **capacity of 50 litres**, this waste bin meets the needs of locations with high usage volume, keeping the space organised and functional. The waste bin **dimensions are 50 x 33 x 100 cm (length x width x height)**, while the **inner container measures 44,5 x 28 x 60 cm (length x width x height)**, ensuring good internal capacity without compromising overall stability.
