

Configurable Professional Laundry Trolley for Dirty Linen Hotel

Description

Developed for laundry, housekeeping and internal logistics operations, this professional laundry trolley stands out for its high level of customization. Suitable for hotels, hospitals, industrial laundries and service companies, it allows full adaptation of the configuration to the specific needs of each operation.

Available in different structural configurations, it can be supplied with 2, 3 or 4 sides, with or without doors, including versions with half door, single door or double doors for greater transport security.

The structure adapts to the type of use, with different base formats and available heights, allowing optimization for both reduced spaces and high-volume operations. The electro-galvanized coating ensures corrosion resistance and durability in demanding and continuous-use environments.
